

WHY CZ ELECTRONICS

Through continual investment, Research & Development and intense skills development our business has developed over the last 20 years to become a globally competitive entity in the world of Electronics manufacturing.

CZ Electronics is Africa's premier EMS company. With an enviable history of Component and Product manufacture, CZ houses every competency required to become your partner of choice for electronic manufacturing.

VOLUME & STANDARDS

CZ is a world-class EMS with local expertise and experience. With the ability to manufacture +/- 500,000 c.p.h., 200 TV's per day and more your EMS requirements will be well served by CZ Electronics.

CZ Electronics is ISO 9001-2015 certified and we can proudly state that we have one of the lowest defect rates in the world for all components and products manufactured at our facility. CZ is also a member of the South African Electrotechnical Export Council.

TAKING CARE OF YOU

We have the machinery and we have the ability but it's ultimately about you and your business. We offer tailored solutions such as bespoke products, features, functionality & production volumes to cater for your every requirement. We also back these products up with after sales peace of mind in the form of a 3-year manufacturing warranty.

RANDS & SENSE

Manufacturing locally makes sense on many fronts - not least of each, pricing. The elimination or reduction of import tariffs and bilateral trade agreements throughout Africa as well as CZ's globally competitive manufacturing economies of scale means your business has an edge when dealing with international competitors.

These competitive elements combine to make CZ Electronics a formidable EMS competitor on a global scale and an asset to the African continent.
